**ATRALOC® NEEDLE-SUTURES**

**ETHICON®**

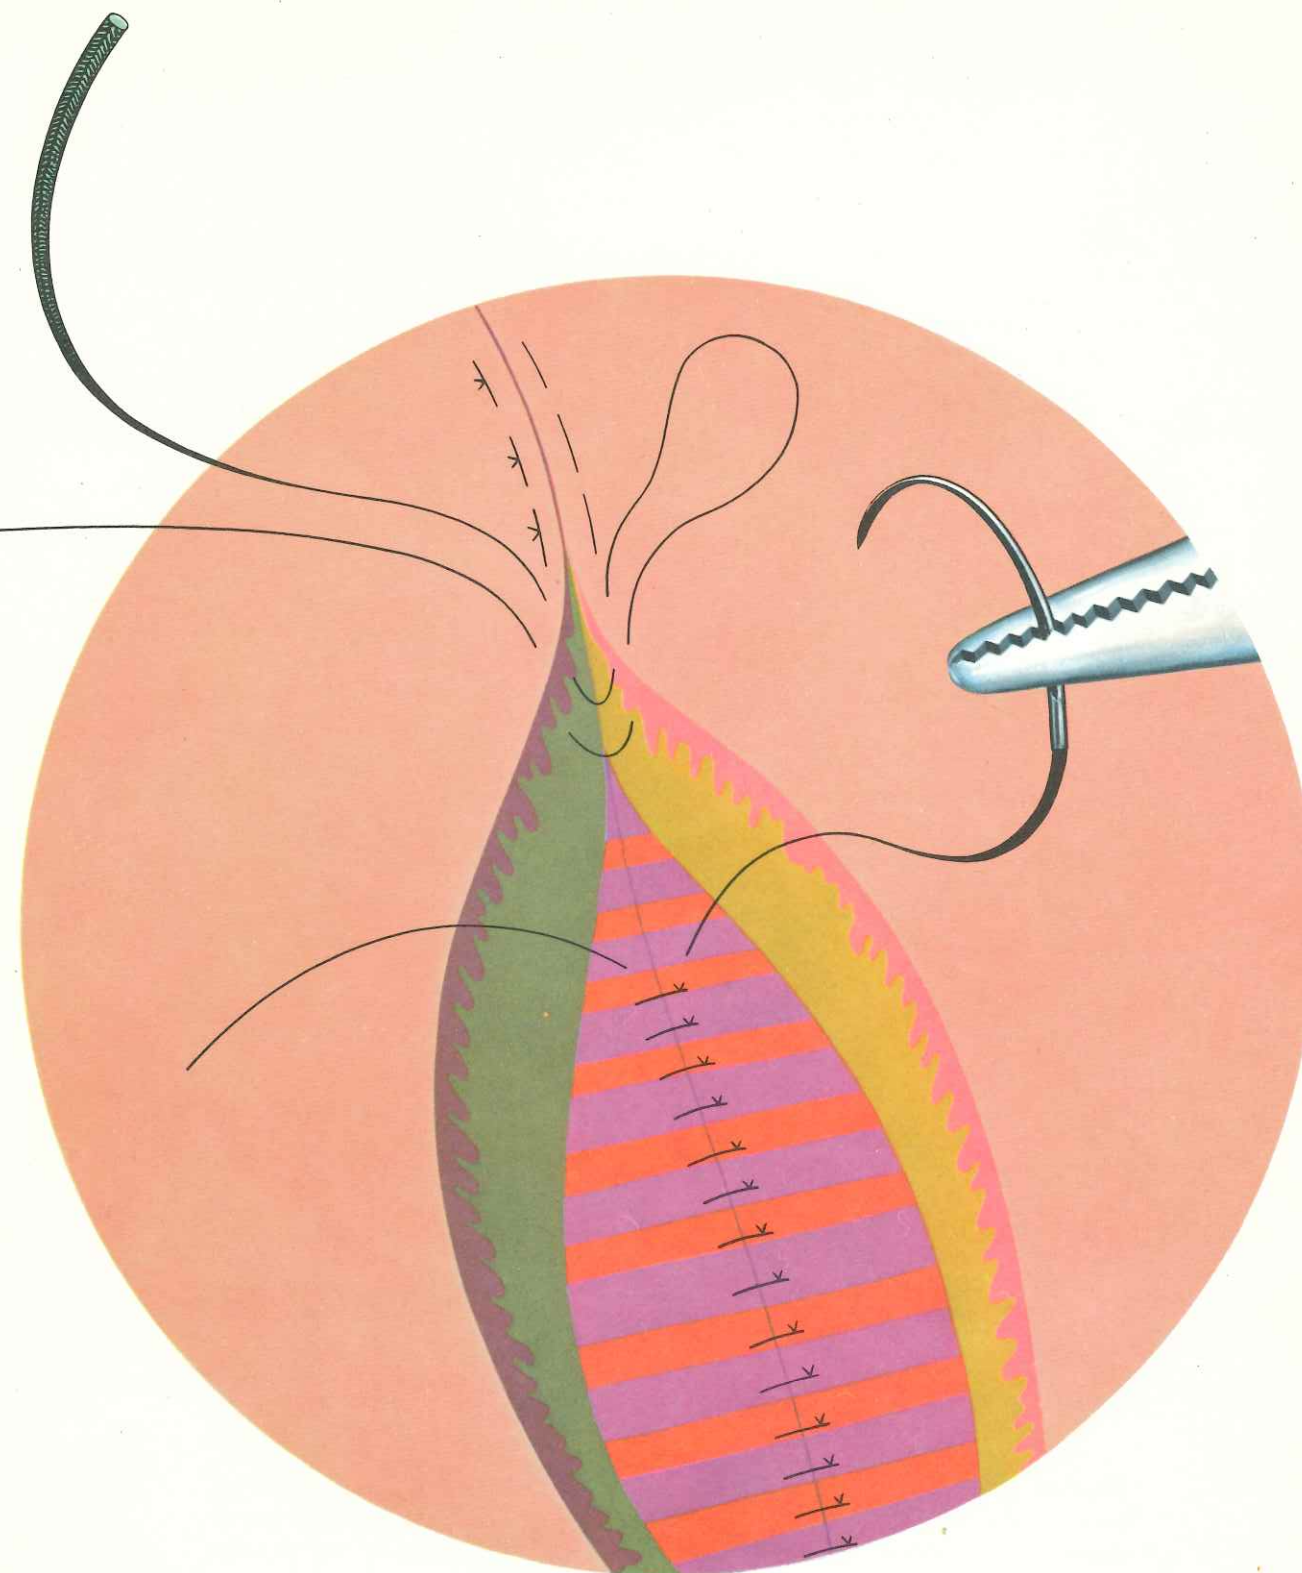

606/228

**FASTER CLOSURE**  
**...BETTER COSMETIC RESULTS**  
**KEITH ATRALOC® NEEDLE**

Shallow bite of this specially designed needle saves time and effort in closure. May be held in the hand without needle holder while the other hand approximates tissue. Because Keith Needles are swaged to the suture material, needle-suture combinations are ready for use... discomfort and trauma are minimized. Supplied with strong, easy-handling MERSILENE® Polyester Fiber or PERMA-HAND Surgical Silk.

## ADVANCING WITH SURGERY

# GENERAL CLOSURE SUTURES

AVAILABLE IN FIVE MATERIALS

## **SURGICAL GUT**

Collagen-Pure Surgical Gut provides greater uniformity in strength and absorption...minimal antigenicity...practically eliminates the possibility of allergic reaction.

## **SURGICAL SILK**

Through built-in controlled processing, PERMA-HAND Surgical Silk insures optimum strength and extensibility plus superior handling characteristics.

## **MERSILENE®**

Non-absorbable MERSILENE Polyester Fiber possesses a greater tensile strength than natural fiber...a non-waxed, smooth surface that minimizes trauma and tissue reaction.

## **SURGICAL COTTON**

This suture material is made from long-staple, specially processed cotton...provides strength up to 30% greater than U.S.P. requirements.

## **SURGICAL STEEL**

Formulated to exacting specifications, ETHICON Surgical Steel offers almost complete physiological inertness...won't kink, twist, or break during use.
